

750 Cleaner

Step 1

Wet surface with fresh water and remove any large debris. This can be done with a hose, pressure washer, or mop and bucket.

Step 2

Create a cleaning dilution for the application that best suits your needs.

Maintenance:	one part Concreation 700 Cleaner to 80 parts water.
Light Cleaning:	one part Concreation 700 Cleaner to 60 parts water.
Normal Cleaning:	one part Concreation 700 Cleaner to 40 parts water.
Heavy Cleaning:	one part Concreation 700 Cleaner to 20 parts water.

Step 3

Spread mixture on floor and let stand for 2-3 minutes. Scrub thoroughly with floor machine or mop. Rinse well and let dry. For normal cleaning or as a general maintainer, repeat these steps 3 to 4 times per day.
