

#### PRODUCT DESCRIPTION

- CCI-300 Liquid Release is designed for use with CCI-400 Stamp Mix Overlay or anytime Powder Release Agents are not desired or cannot be used. Can also be used to apply Powder Release Agent on existing textured concrete – allows powder to settle into depressions and Liquid Release will evaporate.

#### RELEASE POWDER FEATURES AND BENEFITS

- Allows a clean bond break between fresh concrete and stamping mats.
- Dust free.
- Low VOC/Low Odour

#### DIRECTIONS FOR USE

- CCI-300 Liquid Release should be sprayed lightly on the under-side of the stamping tools being used. Wait until the initial set of the surface to be stamped and then apply.
- In cases where coloured release is desired or needed, CCI-300 Powder Release may be incorporated on existing stamped concrete and CCI-300 Liquid Release may be used as a carrier – the powder/colour will deposit in the crevices and impressions, and CCI-300 Liquid Release will evaporate. For professional use only. See Application Guide for more details.

#### SHELF LIFE

- 4-5 years unopened in original container.

#### COVERAGE

- Approximately 1000 square feet /92 square metres for each 5 gallon pail. Extrem temperatures may cause variation in coverage. Not recommended for use below 7 degrees Celsius or above 30 degrees Celsius.

#### PACKAGING

- Available in 5 gal (18.9L) pails.

#### WARRANTY

- Concreation Canada Inc CCI-300 Liquid Release Agent is warranted to be of uniform quality within manufacturing tolerances. Since control is not exercised over its use, no warranty, expressed or implied, is made as to the effects of such use. Seller and manufacturer's obligation under this warranty shall be limited to refunding the purchase price of that portion of the material proven to be defective.
